

**VCTV is the World Wide Leader in
Community Information Channel Systems**
Serving Our Customers for Nearly 20 Years

Utilizing four Methods of Communication VCTV Continues to Remain on the Cutting Edge of Resident Information Channel Technology.

Each communication method is specifically designed by VCTV to best perform various feature rich "application specific" functions selected by the customer. VCTV offers customized use of the appropriate communication methods to successfully service each community's specific communication needs.

"Every retirement community is different.....every resident audience is unique. VCTV provides our customers the opportunity to customize their VCTV system specifically for their community's requirements."

James E. Sheedy; President,
VCTV, Inc.
